- Graduate - Leeds Beckett University - Creative Media Technologies
- Leeds Ethical Hacking Society Committee member – Public Relations Officer/Media Dep.
- Repeated Roll of Honour Awards for attaining 5 A - A*
- Head Boy at Swans International Sierra Blanca – 2 Years

Experience

CEFAR | DEVELOPER JAN 2017 - CURRENT

Mainly tasked with the development of websites - some powered by WordPress as the CMS. This included setting up my own development environment with XAMPP and Gulp, sometimes working with an existing Gulp environment. Coordination with other developers using Git was essential for working on projects at the same time.

AVOCADO | WEB DEVELOPER OCT 2016 - MAR 2017

Worked with Avocado on 2 WordPress powered projects. Both were company websites, they required integration of translation management software, theme updates and, on one occasion, a re-organisation of the website infrastructure. Avocado acted as the designer for these projects, as well as the front for communicating with the clients.

LEEDS ETHICAL HACKING SOCIETY | WEB DESIGNER APR 2016

Created a static web page to stand in for the website still in development for the LEHS. The web page was purely informational and was created using Git and Gulp for the environment. This accomplished the need for a center of information relating to the event which the LEHS was part of whilst their website was being constructed.

NATURPARK PÜRKERSDORF | WEB DEVELOPER OCT 2015 - JAN 2016

Being the only Wordpress Developer in the University led Design team. I built upon a blank Wordpress Theme Template. I integrated Plugins and ensured they fit appropriately to the rest of the website. Communication with the rest of the team was enabled using Git and Bitbucket as the hosting provider.

IWF | WEB DESIGNER DEC 2014 - APR 2015

I was asked to create a landing page which would advertise the services offered by iWF. This page included CSS animations to give the page some life.

LEEDS BECKETT STUDENT UNION | WEB DESIGNER OCT 2014 - DEC 2014

This project entailed creating an HTML e-mail template which could then be re-used by the Student Union for their quarterly e-mails. This included hosting a web version of the HTML e-mail in case readers were not able to view the original e-mail properly. There was close communication with their Graphic Designer in an effort to create an effective e-mail design.
